

USB Contoured Keyboard™ Family

MPC™ technology
- The only Mac/PC
configurable keyboard

Advantage™ Pro

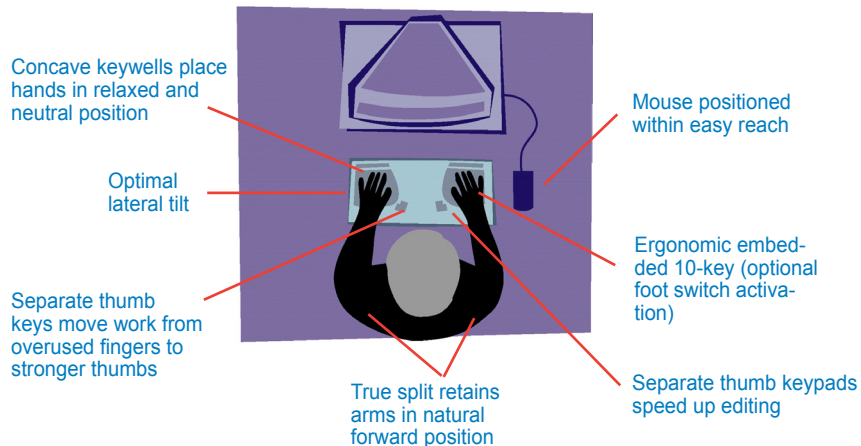

A more Comfortable & Productive Design...

The Kinesis® *Contoured Keyboard* family is based on a unique, patented design that minimizes the pain and strain typists experience from heavy use of conventional computer keyboards. Yet productivity is greater than with any other keyboard, leading to its popularity with intensive typists everywhere.

This ergonomic design resulted from almost two years of research and testing and has proven itself in more than ten years of commercial use. Kinesis contoured keyboards are prescribed by physicians and placed by therapists dealing with keyboard-related overuse injuries.

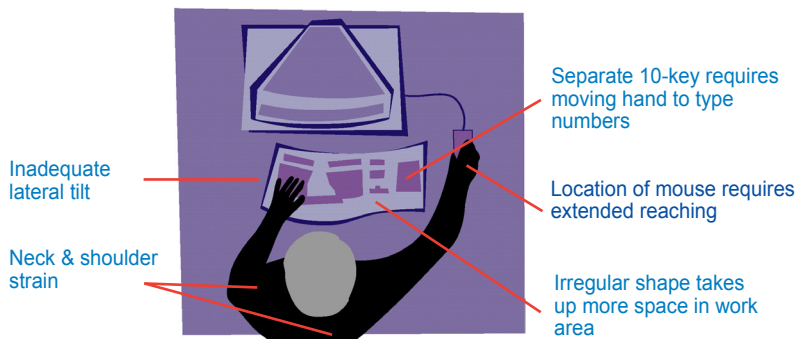

THE KINESIS CONTOURED KEYBOARD

Symmetrical alignment of body, keyboard, and monitor

THE ALTERNATIVE

Awkward alignment of user, keyboard, mouse, and monitor

Keyboard Models...

- Two-year limited warranty on keyboards.
- Any recent model can be upgraded to another. Upgrades performed at the Kinesis factory with two-day turnaround. Some models can be field upgraded (please inquire).
- Technical support is free except for normal long distance charges.

Selected Accessories

Foot Switches All contoured keyboards accept single (FS007RJ11) or triple (FS007TAF) action foot switches. Ideal for 10-key work. First foot switch action activates the 10-key until it is released. The second and third foot switch actions serves as an extra "Shift" key and performs a keypad "Enter". Programmable keyboards allow foot switches to produce any key action or macro.

Solution™ Platform Systems The *Solution* platform system incorporates an elegant, ultra thin keyboard tray (26 or 30 inch tray lengths) attached to a 17 inch or 22 inch fully adjustable arm. The platform slides on a ball bearing track and stores conveniently underneath desk when not in use. Compatible with both Kinesis and other ergonomic keyboards.

Smart Cat Pro™, Smart Cat™ & Easy Cat™ These touchpad pointing devices fit perfectly on the center top portion of contoured keyboards. This is a convenient alternative to locating the touchpad to either side of the keyboard.

DXT Mouse 2 The DXT mouse promotes a neutral (more vertical) wrist posture while allowing the hand to work with a light touch fingertip hold providing precision cursor control. It is the only compact ambidextrous ergonomic mouse designed to use the precision movements of the hand. Available in both cabled (PD7DXT) and wireless versions (PD7DXT-WR).
